

# METHOD AND APPARATUS FOR DESIGNING AND LOCATING CHEMICAL STRUCTURES

## Abstract

An exemplary embodiment of the invention relates to a method, system, apparatus, and storage medium for designing and locating chemical structures. The apparatus comprises a user accessible chemical design and query tool comprising a user interface including an interactive host and a database storing a graphical representation of at least one chemical design structure. Upon accessing the chemical design and query tool by a user, the user interface guides the user in selecting a chemical design structure, and submitting the chemical design structure to a provider system. The invention also includes a method, system, and storage medium.

## Figures

1. The first figure is a line graph showing the relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours (0 to 10), and the y-axis represents the score (0 to 100). The data points are as follows:

Hours	Score
0	50
1	55
2	60
3	65
4	70
5	75
6	80
7	85
8	90
9	95
10	100

2. The second figure is a bar chart showing the distribution of test scores. The x-axis represents the score range (0-10, 10-20, 20-30, 30-40, 40-50, 50-60, 60-70, 70-80, 80-90, 90-100), and the y-axis represents the frequency (0 to 10). The data is as follows:

Score Range	Frequency
0-10	1
10-20	2
20-30	3
30-40	4
40-50	5
50-60	6
60-70	7
70-80	8
80-90	9
90-100	10
